## EXECUTIVE SUMMARY

The Department of Developmental Services (DDS) conducted a federal compliance monitoring review of the Targeted Case Management (TCM) and Nursing Home Reform (NHR) programs from September 14-16, 2009, at Redwood Coast Regional Center (RCRC). The monitoring team selected 21 consumer records for the TCM review. A sample of four records was selected from consumers who had previously been referred to RCRC for a NHR assessment.

### Purpose of the Review

Case management services for regional center consumers with developmental disabilities were added as a medical benefit to the Medi-Cal State Plan in 1986 under Title XIX of the Social Security Act. TCM services are those "... services which will assist individuals in gaining access to needed medical, social, educational, and other services." DDS implemented the TCM program statewide on July 1, 1988.

The NHR Pre-Admission Screening/Resident Review (PAS/RR) program involves determining whether an individual in a nursing facility with suspected developmental disabilities is developmentally disabled and requires specialized services.

### Overview of the TCM/NHR Compliance Monitoring Protocol

The review criteria for the TCM and NHR programs are derived from federal and state statutes and regulations and the Centers for Medicare & Medicaid Services guidelines relating to the provision of these services.

### Findings

#### Section I – Targeted Case Management

Twenty-one consumer records, containing 1,454 billed units, were reviewed for three criteria. The sample records were 100% in compliance for criterion 1 (TCM service and unit documentation matches the information transmitted to DDS), 99% in compliance for criterion 2 (TCM service documentation is consistent with the definition of TCM service), and 100% in compliance for criterion 3 (TCM service documentation identifies the individual who wrote the note and the date the note was completed).

#### Section II – Nursing Home Reform

Four consumer records were reviewed for three criteria. The four sample records were 100% in compliance for all three criteria.

## **SECTION I TARGETED CASE MANAGEMENT**

### Criterion

1. The Targeted Case Management (TCM) service and unit documentation matches information transmitted to the Department of Developmental Services (DDS).

### Findings

RCRC transmitted 1,454 TCM units to DDS for the 21 sample consumers. All of the recorded units matched the number of units reported to DDS.

### Recommendations

None.

2. The TCM service documentation billed to DDS is consistent with the definition of TCM service.

Allowable TCM units are based on services which assist consumers to gain access to needed social, educational, medical or other services and include the following components: 1) assessment and periodic reassessment to determine service needs; 2) development and periodic revision of an individual program plan (IPP) based on the information collected through the assessment or reassessment; 3) monitoring and follow-up activities, including activities and contacts that are necessary to ensure that the IPP is effectively implemented and adequately addresses the needs of the consumer; and 4) referral and related activities to help the consumer obtain needed services. However, it is important to note that TCM does not include the direct provision of these needed services.

### Findings

The sample of 21 consumer records contained 1,454 billed TCM units. Of this total, 1,434 (99%) of the units contained descriptions that were consistent with the definition of TCM services. Twenty of the units had descriptions of activities that were not consistent with the definition of TCM services. Detailed information on these findings and the actions required will be sent under a separate cover letter.

Recommendation	Regional Center Plan/Response
RCRC should ensure that the time claimed on those identified activities that are inconsistent with TCM claimable services (sent separately) is reversed.	All the disputed TCM units will be reversed. RCRC will utilize the current and previous ineligible TCM data for training service coordinators.

3. The TCM documentation identifies the service coordinator recording the notes and each note is dated.

### Findings

The TCM documentation in the 21 sample consumer records identified the service coordinator who wrote the note and the date the service was completed.

### Recommendations

None.

## **SECTION II NURSING HOME REFORM**

### Criterion

1. There is evidence of dispositions for the Department of Developmental Services' (DDS) Nursing Home Reform (NHR) referrals.

### Findings

The four sample consumer records contained a copy of the Pre-Admission Screening/Resident Review (PAS/RR) Level I form, or NHR automated printout.

### Recommendations

None.

2. The disposition is reported to DDS.

### Findings

The four sample consumer records contained a PAS/RR Level II document or written documentation responding to the Level I referral.

### Recommendations

None.

3. The regional center submitted a claim for the referral disposition.

### Findings

The billing information for the four sample consumers had been entered into the AS 400 computer system and electronically transmitted to DDS.

### Recommendations

None.
